Managed Hosted Private Cloud
by Advanced Hosting

Enterprise level cloud with bare-metal price

Transparent & Cost-Effective Pricing

Having Private Cloud means full administrative and finance control of the resources you have, so you can avoid unpredictable charges on your cloud infrastructure.
High Performance & Availability

Our infrastructure ensures high availability with multi-AZ deployment , eliminating downtime. Tailored hardware solutions optimize performance for your business needs, while proactive monitoring and real-time logging prevent issues before they arise.
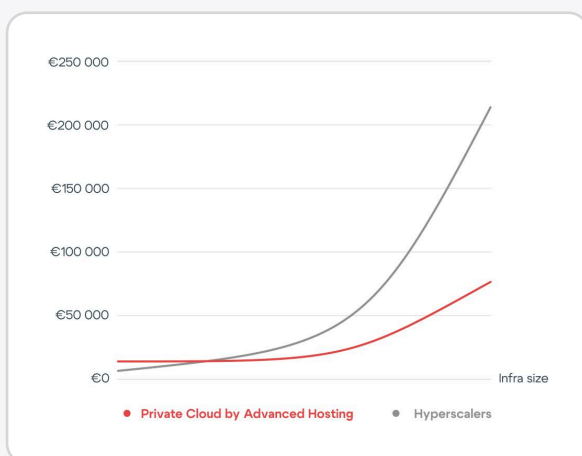

Data Security & Sovereignty

Dedicated Infrastructure gives you comprehensive control of your network access and prevents threat actors from compromising your security and compliance.

Infra size

● Private Cloud by Advanced Hosting   ● Hyperscalers

As your infrastructure grows, you will reach a point where a Private Cloud becomes more cost-effective than Hyperscaler clouds.

With monthly infrastructure budget between $5,000 and $400,000 you may expect 2–3 times IaaS costs reduction.

*These numbers represent cost reduction estimations for a set of typical services: compute, storage, networking, managed DB, and others; cost optimization effect for each specific case may vary.

The paradox of cloud: You're crazy if you don't start in the cloud; you're crazy if you stay on it.
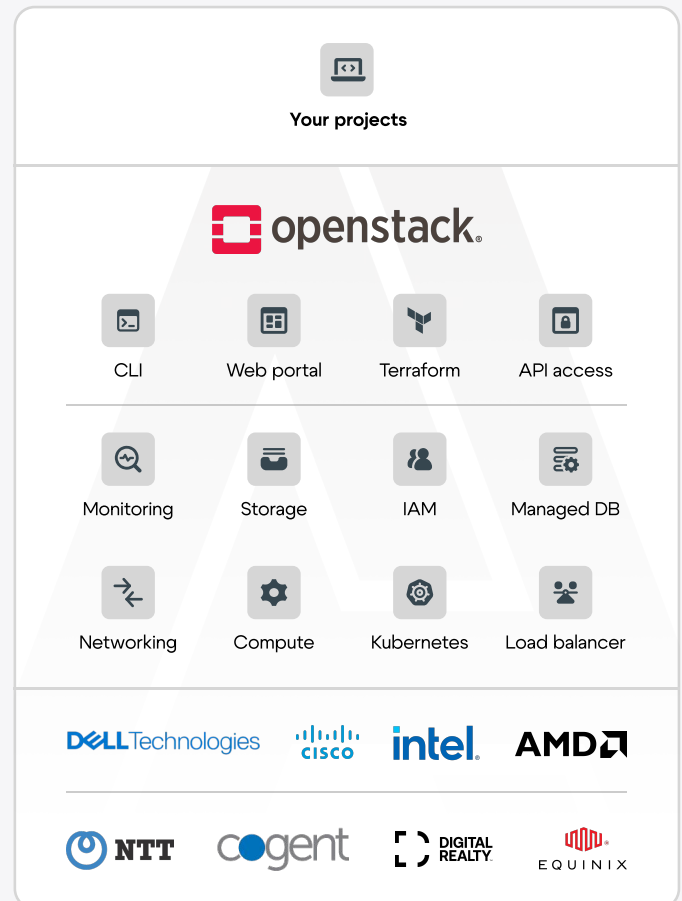

— The Cost of Cloud, a Trillion Dollar Paradox

advanced hosting

Technology
powered by OpenStack

Trusted by CERN, NASA, PayPal, Adobe, Blizzard and other industry leaders.

Open Source solution with one of the biggest growing experts community.

The most widely deployed Open Source cloud platform in the world.

Your projects

openstack.

Key features

Services Coverage
Open-source projects/services are capable to outperform 80-90% of IaaS Hyperscalers services.

Full Data Encryption
Even technical specialists who are managing your cloud have no access to your data.

Customization
Tailored hardware to meet your specific needs and performance requirements.

Independence
Freedom from vendor lock-in with our open-source OpenStack-based solution.

Uninterrupted Availability
Multiple Availability Zones on three continents with 3x replications in each AZ.

Hybrid Solutions
Seamless integration of Private Cloud with Hybrid and Multicloud environments.

Industry Standards Compliance
Support of your compliance efforts on each stage by providing relevant information, including event logs.

One-Stop Shop
Architecture development, hardware sourcing, procurement and setup, platform and services deployment, maintenance and support.
